Tarragona, Spain

Software Development

Java, Python, Ruby, NodeJS

Spring, Memcache, Kafka, Zookeeper

MySQL, MongoDB, Redis, Hive

JavaScript, HTML5, Angular

Grafana, Qlik, Google Analytics

QA Automation

Selenium, Appium, BDD frameworks

DevOps

Jenkins 2.0 + Pipelines

Kubernetes, Docker, Puppet, Terraform, Salt

AWS & Google Cloud Platform

Project Management

Scrum, Kanban methodologies

Jira, Bugzilla, Confluence, Trello

Git, Gradle, Maven, Artifactory

Languages

Spanish, Catalan - Native

English - Full proficiency

French - Professional proficiency

Big fan of Agile methodologies and DevOps culture, I enjoy embracing new technologies and sharing ideas to build up new software architectures.

SUSE - Remote (2008-Current)

I've been maintaining the automated test framework of SUSE Manager product, made in **Ruby** using **Cucumber** and **Capybara**. I've been collaborating in the development cycle of new features and building reliable Continuous Testing.

To deploy our test environments, I use of **Terraform** and **Salt** as IaC, **Jenkins Pipelines** to handle the full workflow of the UI Tests and **GitHub Actions** for Integration tests.

King Games (Activision Blizzard) - Barcelona and London (2004-2018)

I designed and develop from scratch a Java test framework to deliver a high reliable continuous integration, **speeding up 90% of time on recurrent test tasks** in game and internal service teams.

Contribute to DevOps process, improving visibility on real-time data analysis through monitoring tools, streamlining CI/CD thanks to Jenkins, Git Hooks and containerization.

Develop new game and web services features, **leading back-end side**. Always focus on reusability and maintainability, I contributed in a game-server layer and collaborate embedded in a game team to bring awesome game features boosting monetization, retention and virality.

Telefónica Digital - Barcelona (2009-2014)

Start a CDN platform, **leading a QA team of five SDET**. Mainly focus on web services integration. To achieve quick regression tests I designed a test framework in Python offering fast development of BDD tests performed on RedHat servers.

Contributed in an internal RFP, evaluating performance of 3 commercial CDNs, applying **advanced skills in network diagnostics**. Currently Movistar TV is built on top of it.

I also contributed in other R&D projects, in charge of **test automation**, experience in advanced web acceleration, iOS/Android mobile apps and cloud platform. (OpenStack).

INRIA - Nancy, France (2007-2009)

Cooperation with JBoss and Bull developing and integrating a web service on BonitaSoft BPM Solution, to achieve **workflow management** of human and automatic actions.

Contribution in a SOA platform, providing more flexibility in **web services development** in collaboration with the Eclipse community and OW2. Presented at JavaOne 2009.

BULL S.A.S - Grenoble, France (2006-2007)

Learning from the builders how design and develop **BPM process**, using XPDL to define workflows. I did a **performance analysis** of BonitaSoft (before the spin-off), running it in cluster mode on different application containers and JVM distributions.
